PROJECTS

Thinky

Date period Location

An **interactive web app** created for UniPD's OpenDay. Designed to help students understand computer science concepts through **synchronization problem simulations**.

Built with:

- NextJS
- Typescript
- ShadCN UI
- Firestore
- TailwindCSS

Playground

Date period Location

A **multi-feature web app** where I experimented with **React components** and **API integration**, including **TicTacToe**, **Kanban board**, and a **Spotify widget**.

Focused on modular UI design and reusable logic using **TypeScript** and **React**.

- Tic tac toe
- Kanban board
- Spotify API
- Css
- React
- Javascript
